# Around TENTE

## Infinite mobility

**TENTE is moved by only one goal: The World in Motion.**

Our company philosophy is to combine traditional quality with forward looking ideas. TENTE manufactures more than first-class castors and wheels: Our staff at numerous international locations ensure mobility to make life easier. Experience groundbreaking precision, visionary design and a service that is enjoyed all over the world. Experience TENTE.

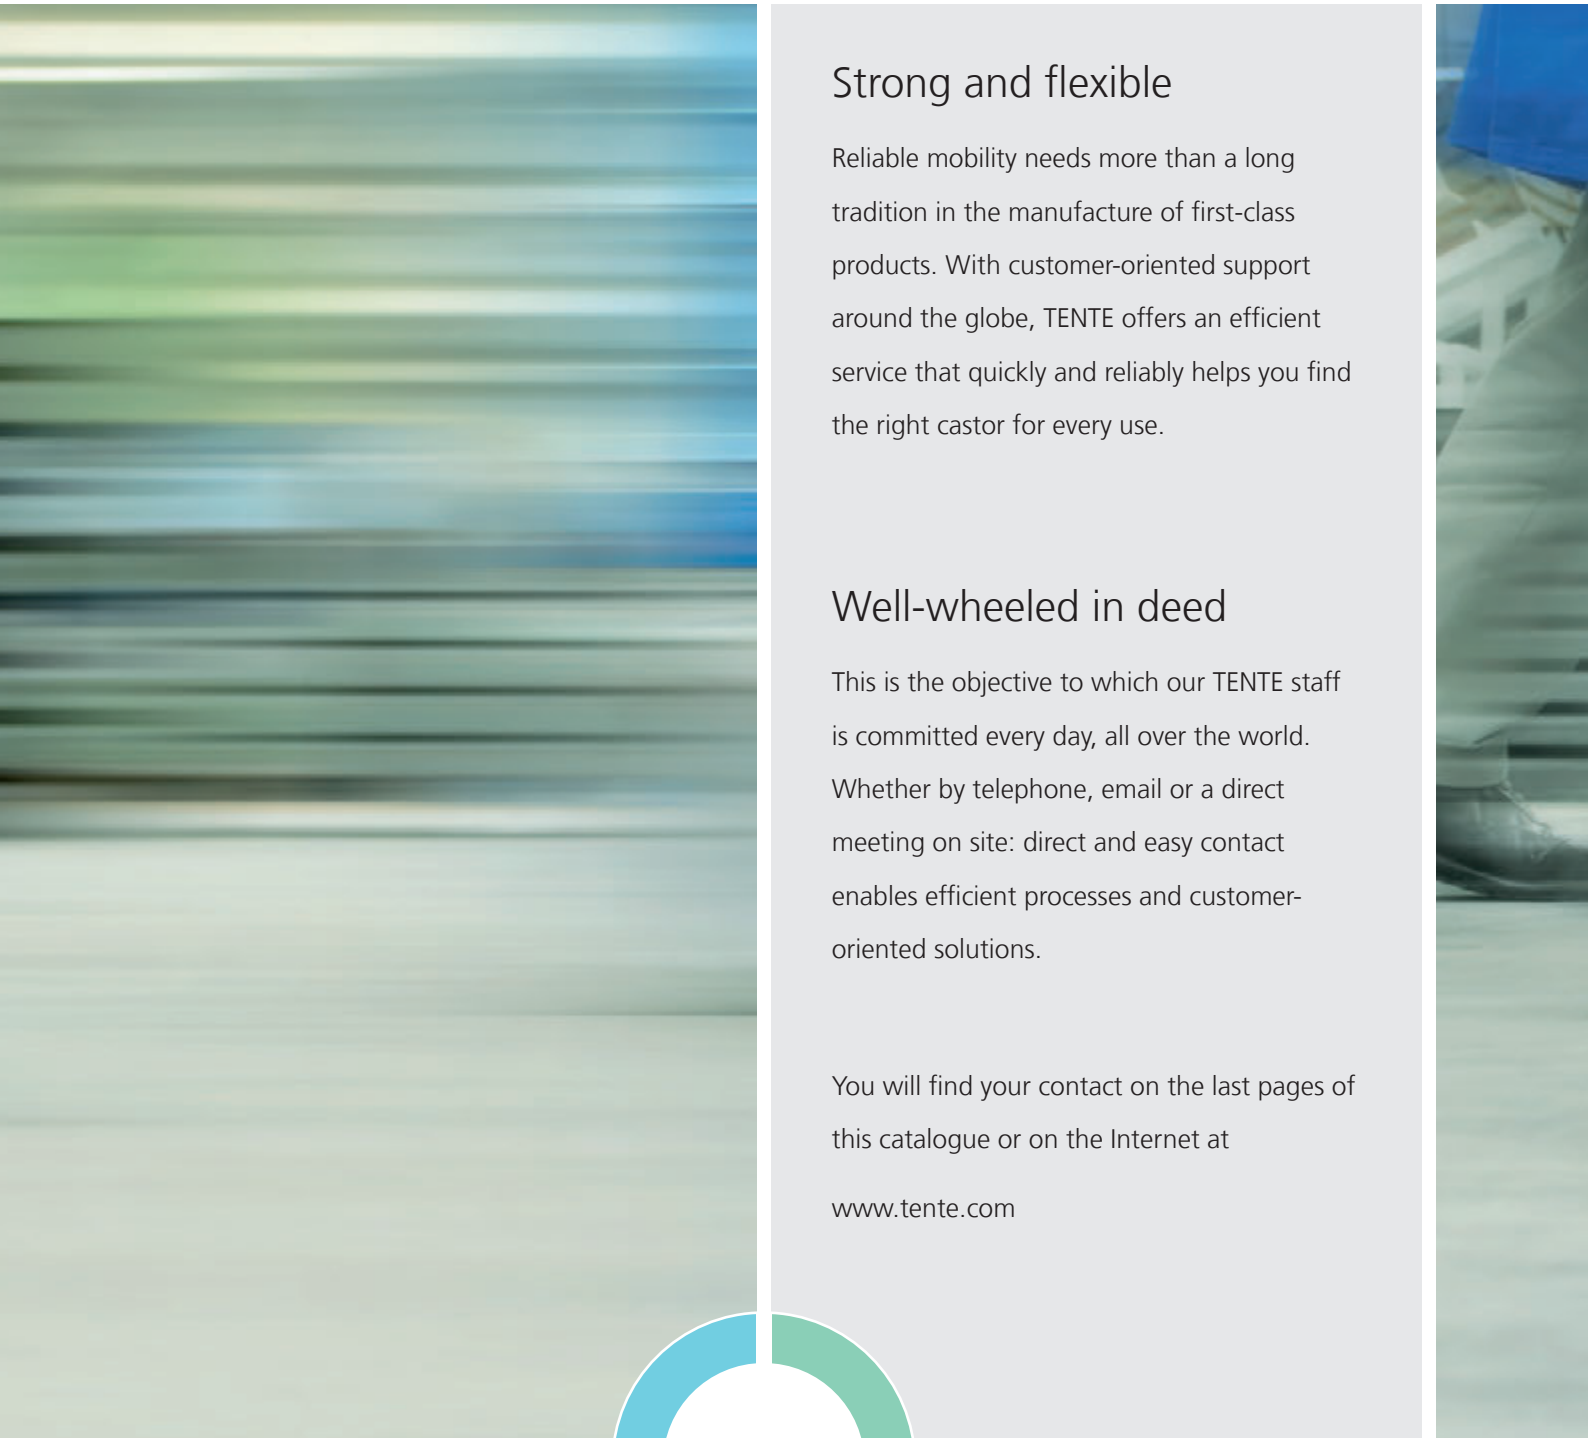

## A complete solution

At TENTE, quality begins with the selection of first-class raw materials and continues with the innovative manufacturing processes and diligent quality control. We also examine each of our products beyond the standards of established norms (DIN, EN and ISO) according to our own, much more demanding criteria. Resulting in proverbial TENTE quality stands for robust, reliable, longevity and functional design. This requirement is appreciated by our customers in meanwhile more than 100 countries.

## Perfectly shaped

One of the special qualities of a TENTE castor is its unmistakable appearance. We place great value on consistent and future-oriented aesthetics - with a result well worth seeing: Numerous design awards top off the TENTE product range.

## Strong and flexible

Reliable mobility needs more than a long tradition in the manufacture of first-class products. With customer-oriented support around the globe, TENTE offers an efficient service that quickly and reliably helps you find the right castor for every use.

## Well-wheeled in deed

This is the objective to which our TENTE staff is committed every day, all over the world. Whether by telephone, email or a direct meeting on site: direct and easy contact enables efficient processes and customer-oriented solutions.

You will find your contact on the last pages of this catalogue or on the Internet at

# Quick to the castor Perfected system

## Efficiently searched and quickly found

To simplify the selection process, we have developed a number that denotes all product characteristics.

## The number's explained.

The simple and logically organised structure of the TENTE order number system enables the rapid identification of each castor.

The number consists of three groups in which all components of the castor are uniquely identified.

Housing				Wheel				Fitting	
<b>3</b>	<b>4</b>	<b>7</b>	<b>0</b>	<b>U</b>	<b>O</b>	<b>T</b>	<b>125</b>	<b>P62</b>	<b>- 105×85</b>
Material	Shape of fork	Swivel bearings	Castor type	Wheel body	Tread	Bearing	Wheel diameter in mm	Fitting type	Fitting dimensions in mm

## Example:

3470 UOT 125 P62-105x85

### Housing

- 3** Housing: pressed steel, heavy
- 4** Shape of fork: broad
- 7** Swivel bearing: two ball races
- 0** Castor type: Swivel castor

### Fitting

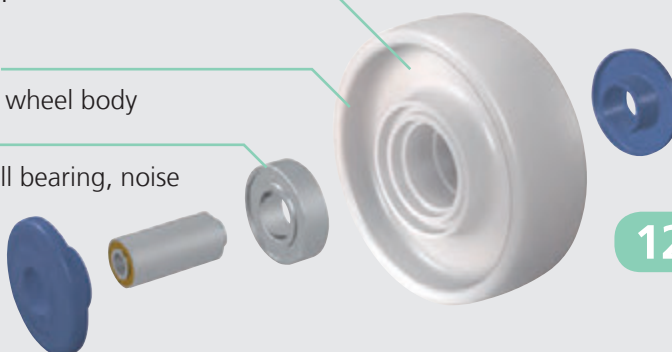

- P 62** Fitting type: rectangular plate
- 105x85** Fitting dimensions: 105x85 mm

### Wheel

- U** Wheel body: Polyamide
- O** Tread: identic with wheel body
- T** Bearing: precision ball bearing, noise reduced

- 125** Wheel diameter: 125 mm

# Quick to the castor

## Updated data

Your key to an order number

### Housing

Material	Shape of fork	Swivel bearings	Castor type
0 Wire and other profiles made of metal	0 closed	0 fixed stem	0 Swivel castor
1 steel sheet, light	1 angular	1 one ball race, edged	1 directional lock
2 steel sheet, medium	2 straight	2 stem, swiveling	2 total lock, head end of castor
3 steel sheet, heavy	3 slim	3 one ball race	3 intermittent (LA) brake
4 steel sheet, very heavy	4 broad	4 precision ball bearing	4 central, total- or directional lock
5 Polyamide	5 Twin wheel castor, closed, with dome	5 deep-groove ball thrust and tapered	5 Wheel brake
6 zinc-die-casting / Alu	6 broad, reinforced	6 double ball bearing swivel head, weld	6 central-, total lock
7 stainless steel for institutional castors	7 with spring	7 two ball races	7 total lock, tail end of castor
8 stainless steel for industrial castors	8 special feature	8 two ball races, reinforced	8 Fixed castor
9 cast iron, or iron forged, heavy	9 Twin wheel castor	9 free for fixed castors	9 special feature
A Polypropylene	A Twin wheel castor, closed	A	A
B Polyacetal	B	B	B

### Wheel

Wheel body	Tread	Bearing
A	A PUR Polyurethane, injected	A plain hub
B heat resistant duroplastic, one ball	B PVC, injected	B bore hole with keyway
C Polyurethane casted	C PUR, poured HITEC	C precision ball bearing, stainless
D pressed steel	D shock absorbing, heat resistant	D roller bearing, stainless
E steel, iron	E elastic tyre, black, vulcanized	E cone ball bearing, stainless
F cast iron	F non-marking elastic tyre, vulcanized	F flange wheel
G asymmetric wheel	G electric conductive injected rubber	G self-lubricating bushing
H shockabsorbing wheel body (hybrid)	H antistatic	H plain bearing with threadguards
I Aluminium	I solid rubber non-marking	I plain bearing without threadguards and spacer
J zinc-die-casted	J injected rubber	J roller bearing with threadguards
K	K PP-soft	K cone ball bearing
L wood	L solid rubber tyre, yellowline	L roller bearing with metal bushing
M Polyamide PA, extra heavy duty	M double flanged with tracks	M plain bearing, stainless
N Stainless steel / Niosta	N PU, foamed	N end wheel
O	O identic with wheel body	O plain bearing, without threadguards
P Polypropylene PP	P pneumatic, line profile	P precision ball bearing
Q Polyurethane injected	Q pneumatic, patterned profile	Q taper bearing
R	R solid rubber rec.	R roller bearing without metal bushing and
S steel sheet, heavy	S PUR injected, electric-conductive	S roller bearing, noise reduced
T Polyamide PA, heavy duty	T PUR casted	T precision ball bearing, noise reduced
U Polyamide PA	U Polyamide	U plain bearing with synthetic spacer
V solid rubber	V solid rubber, black	V
W heat resistant thermoplastic synthetic	W hard-soft rubber	W
X Polyamide PA, electric conductive	X tyres for waste disposal systems	X precision ball bearing, sealed
Y Polypropylene PP, electric conductive	Y solid rubber, black, electric conductive	Y precision ball bearing RS or 2 RS
Z flanged wheel	Z	Z bore, blank

## Fitting

### Wheel diameter

The size refers to the wheel diameter (mm) and has to be written three digits (i.e. 050). Wheels as end-product without housing have an additional number, standing for the tread width.

Fitting type		Dimensions			
Main group	Sub group				
R to be fitted into vertical tube ends or blind holes	R03 rubber expanding (round)	R26 stem for central locking castor, brake limitation	Dimensions are listed respectively by length, width and diameter.		
	R05 solid plug (round)	R36 stem for central locking castor, brake limitation, short			
	R06 synthetic expander, short (round)	R40 plastic socket (square)			
	R07 plastic expanders (round)	R43 rubber expanding (square)			
	R08 reducing bush (round)	R46 synthetic expander, short (square)			
	R09 knurled bolt	R47 plastic expander (square)			
	R10 stem threaded for castors for furniture	R48 reducing bush (square)			
	R15 solid plug (square)	R50 plastic socket, round circlip outside (round)			
	R20 plastic sockets (round)	R75 solid plug, screwed (round)			
	R21 zinc-die-cast sockets	R85 solid plug, screwed (square)			
	P to be fitted with screws (plates)	P10 stem with U-shaped plate, for castors for furniture		P62 rectangular plate according EN-R 42, 105x85 mm	
P11 stem with L-shaped plate, for castors for furniture		P63 rectangular plate according EN-R 43, 137x105 mm			
P30 bolt hole		P64 rectangular plate according EN-R 44, 175x140 mm			
P31 bolt hole, inner ballrace reinforced		P65 rectangular plate according EN-R 45, 200x160 mm			
P40 square plate 60 x 60 mm		P66 rectangular plate according EN-R 46, 250x200 mm			
P41 square plate - special (e.g. 55 x 55 mm)		P67 plate with central locking			
P50 rectangular plate 77x67 mm		P68 rectangular plate 270x250 mm			
P51 rectangular plate 95/90x70, standard 75x50 mm		P69 plate 137x105 for central locking castor, cam actuation			
P52 rectangular plate 95/90x70, US-bolt hole spacing		P70 plate 105x85 for central locking castor, cam actuation			
P53 rectangular plate 55x70 mm		P72 vertical flange			
P54 rectangular plate 55x70 mm, with brake elements		P73 triangle plate			
P60 rectangular plate - special (e.g. 120x80 mm)		P74 vertical square plate			
P61 rectangular plate according EN-R 41, 75x60 mm		P80 round plate			
S to be fitted with screws or threaded bolts		S10 threaded stem, for profile acc. to DIN 1998	S62 hex screw, fixed		
		S50 socket head cap screw, loose fitted	S63 hex screw, loose packed		
		S51 socket head cap screw, loose fitted, inner ballrace reinforced	S70 threaded stem with hexagon neck (top)		
	S52 socket head cap screw, fixed	S73 threaded stem with round neck (top), riveted			
	S53 socket head cap screw, loose packed	S74 threaded stem with hexagon neck (top), riveted			
	S59 socket head cap screw, secured	S75 threaded stem with round neck (top), fitted from bottom			
	S60 hex screw, loose fitted	S80 wood screw			
	S61 hex screw, loose fitted, inner ballrace reinforced				
	H for wood furniture	H40 plastic socket			
	B for incomplete fitting	B07 metric screw / thread DIN 13 for R07	B20 stem without circlip, with collar		
		B10 stem with circlip, with collar	B21 stem without circlip, without collar		
B11 stem with circlip, without collar		B30 welding stem			
L fittings to be mounted supplementary	L50 with grip ring for B10 fitting	L51 blind hole for B10 fitting

# Quick to the castor Complete service

## Search

On our website at [www.tente.com](http://www.tente.com) you will instantly find what you are looking for: The intuitive search options quickly and reliably deliver the matching castor. Available in more than 30 languages.

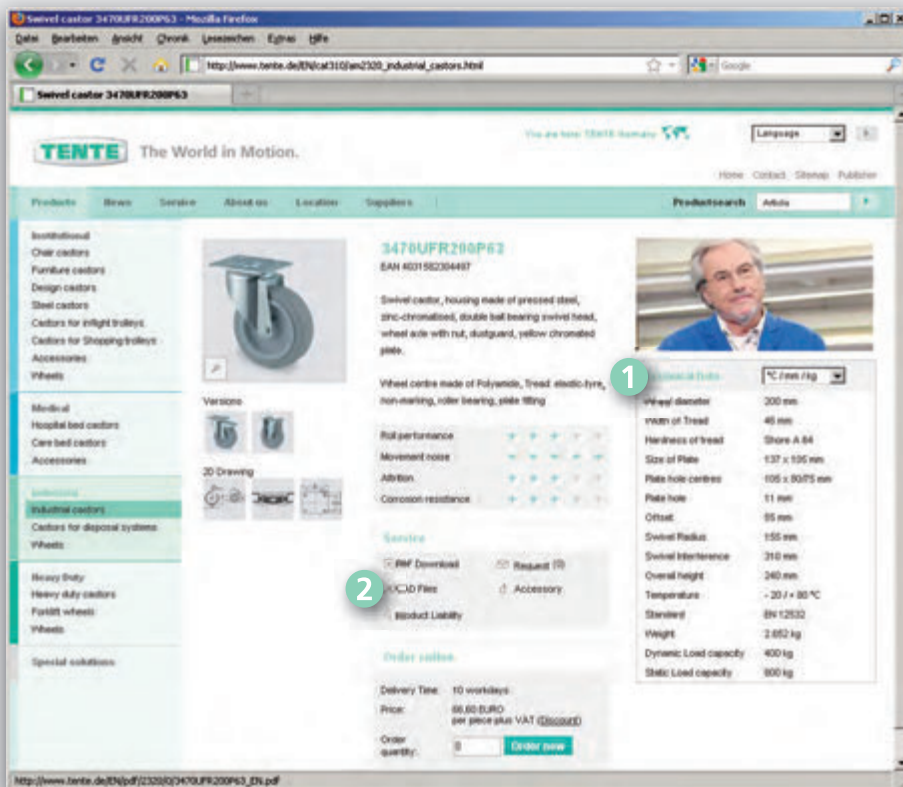

1 Product search by area and application range

2 Refine your search according to individual requirements

## Information

Detailed information on the selected castors are also available to you, such as technical data and design drawings.

- 1 General product information and detailed technical data on every castor
- 2 Download CAD data, design drawings and technical information

# Quick to the castor Popular format

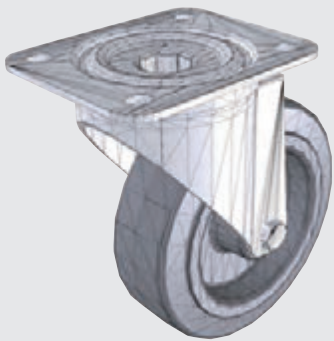

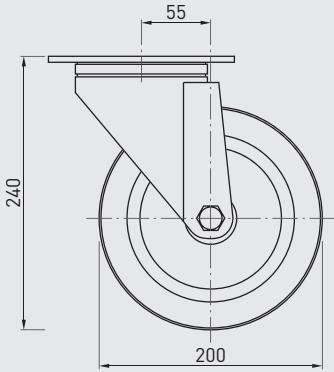

## CAD service

Use the TENTE CAD service in our online catalogue to conveniently request the construction data for a large part of our product range. On the product data sheet of your selected castor, simply click on the corresponding link "CAD Data".

Depending on the availability, you may choose from the following formats:

- 3D Studio MAX
- Allplan 2008
- AutoCAD
- Aveva Marine (PDMS)
- Caddy++
- Cadkey CDL
- Catia

- XGL

## Know-how

# Strong character

## The material determines the characteristics

No castor material will fulfil all the requirements equally well. The two diagrams on the right show why, using the example of apparatus and transport castors. They summarise several results of the TENTE quality tests and show the interaction of the material properties.

One example: A hard polyurethane castor (orange) provides a high load bearing capacity, low roll and swivel resistance and practically no attrition – ideal properties. However, due to its relative hardness, it has the highest surface pressure of the castor materials examined here.

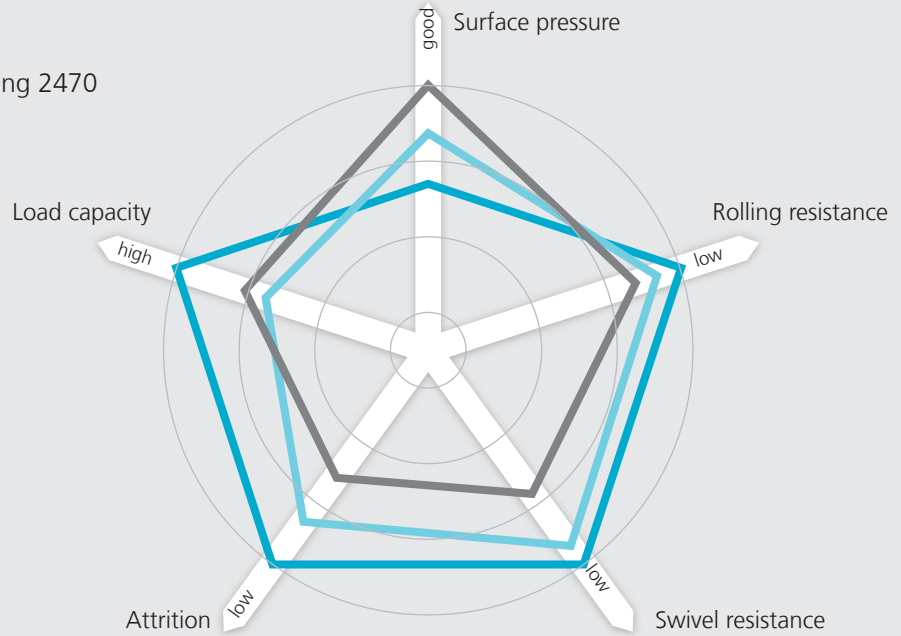

The differences are even more extreme between the properties of the four castor materials for transport equipment castors (the lower diagram). The properties of polyamide (yellow) and full rubber (green) all diverge greatly concerning all parameters of their properties. Anyone not requiring a low surface pressure is well served by polyamide, however has to accept a high roll resistance and loud travel noises as backdraws. Polyurethane (orange) is a good alternative for a lower load capacity and has a very low surface pressure.

Other factors in addition to the interactions illustrated here also play a role. Please refer to the following pages for information about what the various properties mean.

### Institutional castors

Tested with 125 mm wheel in housing 2470

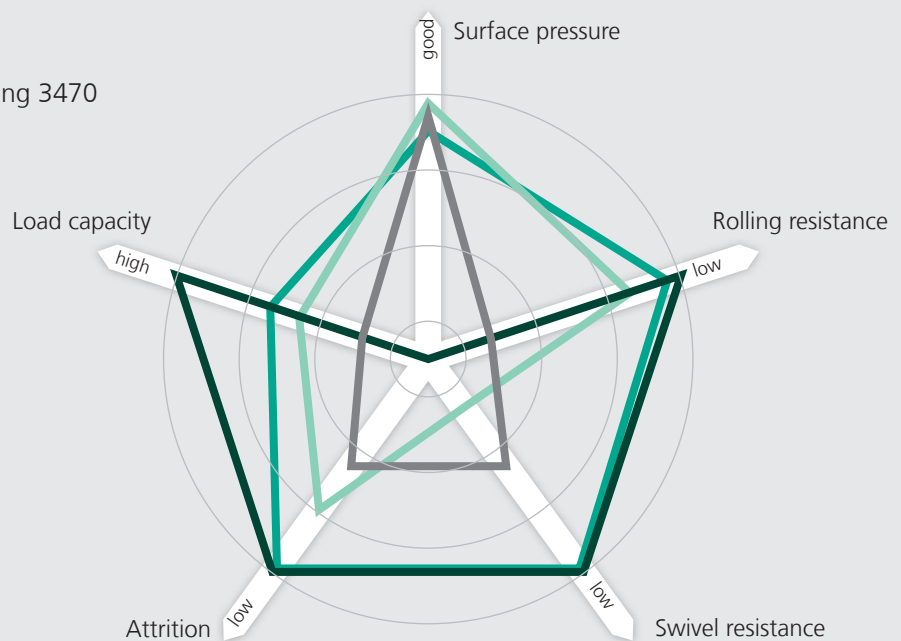

- solid rubber
- injected rubber
- Polyurethane

### Industrial castors

Tested with 200 mm wheel in housing 3470

- solid rubber
- Elastic tyres
- Polyurethane
- Polyamide

# Know-how

## Indicative factors

### Selection criteria at a glance

#### Load capacity

A castor should always travel firmly on the floor. Yet that is mostly pure theory. Castors always briefly lose contact with the floor on uneven surfaces, at door thresholds, tracks and also in potholes. They are suddenly overloaded or only three of the four castors touch the ground, and have to bear the whole load. This must be taken into consideration when calculating the load capacity. The following formula therefore provides the necessary safety reserves: Weight of the device plus load divided by three. All load capacities given in this catalogue have been determined according to EN 12528 to 12533 for dynamic load. Additional static load capacity information is given on our homepage at [www.tente.com](http://www.tente.com).

#### Rolling and swivel resistance

A resistance has to be overcome with a force to get an object on castors moving or to steer it. The level of this resistance depends on various factors: load, wheel diameter, material and shape of the tread, overhang of the castor, type and size of the bearings and of course on the ground on which the castor runs. Therefore, when choosing the right castor, it is important to carefully evaluate all factors in relation to each other. Our sales advisors will be pleased to help you find the optimum combination for your purpose.

Damping properties and travel noises  
Hard floor – soft wheel, soft floor – hard

wheel. This simple rule of thumb can be used to match the floor and the wheel. A hard wheel passes impacts caused by irregularities in the floor directly on to the loads carried. Unpleasant travel noises can be the result. TENTE castors with elastic treads made of rubber or polyurethane help in this case. With the hybrid wheel (HUR) consisting of a hard polyamide tread and a soft rubber core, we can even provide you with a hard, noise-dampening wheel.

#### Surface pressure

Many business and domestic rooms are fitted with delicate floorings (e.g. wood). Each floor may only be loaded to a certain pressure per mm<sup>2</sup>. Therefore, when choosing a castor, particular attention has to be paid to the loading and tread of the wheel. In case of doubt, TENTE can carry out reliable measurements with modern testing equipment. Just give us a call.

#### Temperature resistance

From the arctic climate of a refrigerated warehouse to the oven temperatures of a bread factory – the TENTE range has the optimum solution for every requirement. Details of our products' temperature range is available in this catalogue and at [www.tente.com](http://www.tente.com) or from your nearest TENTE adviser.

#### Contact discoloration

If a rubber wheel leaves marks on a light-coloured floor after standing on it for a certain length of time, we call this

contact discoloration. An unattractive problem, which TENTE engineers have examined and have solved to a far-reaching extent, together with flooring and rubber manufacturers. Almost all grey and electrically conducting TENTE castors therefore leave no discolorations behind. However, aggressive cleaning agents or untreated natural floorings can negatively affect this risk of contact discoloration. If in doubt, contact us.

#### Chalking/Attrition

Chalking is the mechanical attrition of castors under load. It cannot be avoided – especially in elastic tyres, however it can be easily removed from the floor using simple cleaning agents. The severity of the attrition depends on the quality of the rubber used for the wheel.

#### Chemical resistance

In many cases the material resistance has to meet special requirements. Therefore, a table of the resistances of the materials which we mainly use is given in this catalogue.

#### Weathering effects

Year in, year out, sunshine or rain, snow or ice – can throw a castor off balance, but it doesn't have to. Seeing that temperature changes and humidity make each castor unusable due to rust within a very short time, the surfaces of all TENTE's steel components are refined. These parts

are predominantly zinc coated, whereby the chrome plating has a significant influence on surface protection. If that still isn't enough for you, then you should choose rustproof TENTE castors made of stainless steel. Better safe than sorry!

#### Washability

The same is true almost everywhere: Lots of work, lots of dirt. Special TENTE castors are washable so that the traces of work can be easily removed. High quality chromed steel, selected synthetics and components made from rustproof steel protect TENTE castors effectively. Good arguments for a particularly clean investment in first class quality.

#### Conductivity

You know the effect: If a nonconducting material, e.g. plastic, has been charged through friction and the potential is unable to flow away, it discharges with the next earthed contact. This can happen when touching a car door. It might be a simple irritation or cause serious consequences in other circumstances. However electrically conducting TENTE castors protect against this with a leakage resistance of larger 10,000 ohm. We guarantee this by carrying out a one hundred percent quality inspection, during which each wheel is tested under 500 volts direct voltage before leaving our factory.

#### Product User Information

Please pay attention to our product user information. You will locate the product user information on this catalogue, on the Internet or you can request it from us. Please notify your customers regarding the product user information. All products and versions adhere completely to the European norms for castors and wheels. Exception: Series 1410, 1470 and 3370. Customer specific versions can vary dependent on the relative norms.

# Permanent contact

## Analysis of the chemical resistance

The more precisely you know under which environmental conditions your castors are to be used, the more specifically you can co-ordinate them to the relevant conditions.

In this way, premature castor failure due to corrosion, surface changes, loss in strength, brittleness or loss of lubricants can be prevented. Careful matching of all the components guarantees the maximum service life.

Therefore, you should precisely check which chemical substances and ambient influences are present at the place of usage. In addition, the reaction of the materials is also dependent on other factors, e.g. contact duration and concentration of the corrosive substances as well as air humidity and temperature.

The values given in the table are only meant as guide and do not apply for chemical mixtures. Please contact us about special cases.

- ++ Resistant 1) max. 20 °C
- + Conditionally resistant 2) max. 60 °C
- = Non-resistant 3) Crystalline

## Know-how Good run

### Centrepiece of each castor is the wheel bearing

Each castor is worthless without first-class bearings. Therefore, we recommend bearings that are optimal for the respective use and which guarantee the necessary safety reserves.

Besides the tread, wheel diameter and swivel bearing, the wheel bearings determine the manoeuvrability and thus the quality of the castor. Yet every situation sets different requirements: those under furniture in the home differ from those in a commercial firm, those under rubbish containers differ from those for hospital beds and castors under shopping trolleys must meet completely different requirements to those for transporting heavy loads in a factory.

For this reason, TENTE offers the correct solution with optimum bearings for every application. Additionally to the four most common types of bearings, other variants are available on request for special applications.

Tell us what your application is and we will tell you which bearings are the right ones for you.

### Plain bearing

The simplest form of wheel bearings are plain or friction bearings. They are shock-resistant, mostly maintenance free and depending on the material properties also corrosion proof. We recommend plain bearings for wheels on equipment to be moved with a low velocity over short distances.

### Roller bearing

Besides the friction and deep groove ball bearings, this robust type of shock-resistant bearing is mainly used for transport equipment castors. Roller bearings are characterised by their low installation height, relatively low roll resistance, and high load capacity. The travelling speed of wheels with roller bearings should not exceed 4 km/h, around walking speed.

### Cone ball bearing

Cone bearings are one of the most important groups of roller bearings. Their special advantages compared to plain bearings lie in the use of spheres, which provide improved rolling properties.

### Precision ball bearing

The various designs of single row radial precision ball bearings to DIN are the highest quality type of bearings. Wheels with these ball bearings have extremely low roll resistance for maximum load.

## Know-how Precise course

### Running smoothness and manoeuvrability united

Manoeuvrability and flexibility are the most important advantages in the use of virtually every castor. The swivel bearing decides how easy and frictionless its functions.

The overhang, wheel diameter, and in particular the construction of the back bearing determine the swivel properties. Of the various constructions, housings with plain bearings are particularly suited for low to average loads (e.g. chair and furniture castors). We recommend housings with single or double ball collars for larger loads for institutional or industrial use. The double ball collar reduces the friction in the housing, which occurs during tilting, and makes the system run more smoothly.

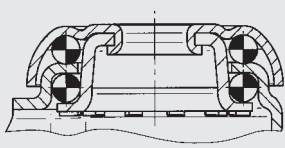

Castors for sensitive laboratory equipment and hospital beds demand maximum noise reduction and smooth running. Therefore, TENTE castors used in these sensitive areas are fitted with high quality precision ball bearings to DIN.

## Matching connection

### Fitting elements for every use

The fitting of the castors and the device to be moved is the interface between you and us. The optimum type of fitting is decided by the functionality of your product and by the efficiency of your production. With proven and innovative concepts, TENTE provides the optimum solution for every requirement: a durable connection with which the castor is quickly and securely mounted.

The design of the equipment to which the castors are to be mounted specify the fitting, such as plates, threaded or gripping stems. Additionally to these standard fittings, expandable fittings are available for special purposes. There are fitting elements with integrated locking systems for central locking equipment. To assure the maximum load capacity of the castor, no matter which type of fitting you choose, the castor must be mounted flush with the equipment.

Contact us if you require a different type of fixing. You can count on us, from the development of your individual solution through the suitable production tools. Just give us a call.

TENTE Institutional

Does it have character, perfect proportions and is really good-looking? Then it must be a TENTE castor. TENTE offers castors suitable for a variety of institutional uses. No matter whether you are looking for a perfectly shaped castor for your designer chair or an indestructible one for your shopping cart, here you will quickly and easily find the matching castor with star qualities: robust, durable and attractive. If the considerable range and the alluring combination options put you in a state of indecision: just call us - we'll be happy to help you to your perfect castor.

P51 INOX: According DIN 18867, Section 8 (Castors for catering equipment), all fittings stainless steel

**Wheel: UAP**  
Wheel centre: Polyamide, Tread: Polyurethane, with integrated threadguards, precision ball bearing

**Wheel: UAX**  
Wheel centre: Polyamide, Tread: Polyurethane, with integrated threadguards, precision ball bearing, sealed

**Wheel: XSX electric conductive, non-marking**  
Wheel centre: Polyamide, Tread: Polyurethane, with integrated threadguards, precision ball bearing, sealed, washable

**Grey brake pedal**  
These castors are also with grey locking lever available.

100kg

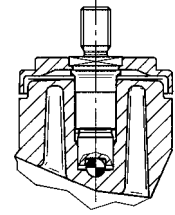

## Design Castors Series 5320

Housing and wheels made from high grade synthetic materials with integrated threadguards, all fittings bright zinc plated, yellow thick layer passivated

Load capacity tested according EN 12530

**Wheel: DIK**  
Wheel centre: pressed steel, Tread: rubber, grey, non-marking, with threadguards, cone ball bearing

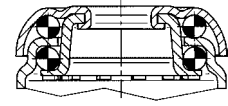

**Wheel: DYK electric conductive and according to ESD**  
Wheel centre: pressed steel, Tread: rubber, black, non-staining, with threadguards, cone ball bearing

**Easy assembly**  
Castors with bolt hole P30 can be assembled with standard screws of any length.

**Accessories**  
Matching sockets for bolt stem castors can be found on page 187.

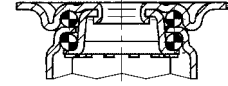

50kg

## Institutional Castors Series 2470

Housing made of pressed steel, bright zinc plated, blue passivated, double ball bearing swivel head, axle riveted

Load capacity tested according EN 12530

Plate fittings see on page 34-35

### Important notice

Designed for the following palletsize:

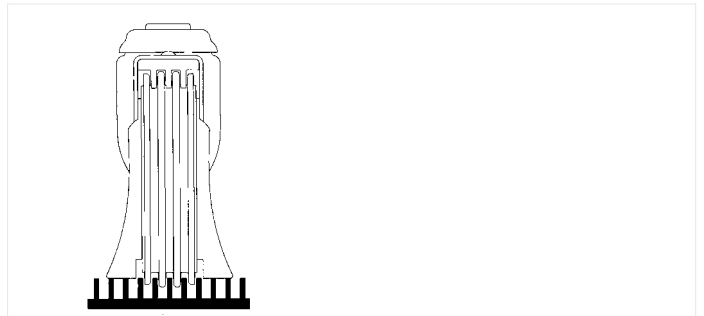

Track width: approx. 2,75 mm

Groove width: approx. 5,7 mm

Groove depth: > 10,0 mm

Distance between tracks: approx. 4,5 mm

Track width: approx. 4,0 mm

### Wheel: QMP

Wheel centre: Polyurethane, Tread: Polyurethane, 4 tracks, selfcleaning between tracks, with threadguards, precision ball bearing

### Fittings

Additional fittings can be shipped upon request.

### Load capacity

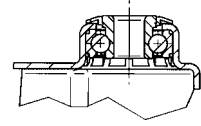

80 kg per castor on level and securely attached floors  
40 kg per castor on walkways

80kg

# Walkway Castors Series 2845

Housing made of pressed steel, bright zinc plated, blue passivated, precision ball bearing in swivel head, threadguards with integrated brake shoe, designed for left and right hand use.

Load capacity tested according EN 12530

### Important notice

Use on uneven floors, outdoors (ground beams, gaps, joints, manhole covers, etc) can affect the life expectancy of castors. Designed for the following palletsize:

Track width: approx. 2,75 mm  
 Groove width: approx. 5,7 mm  
 Groove depth: > 10,0 mm

Track wheel-Ø: 127 mm  
 Track width: 4 mm  
 Engagement travel: 8 mm

**Wheel: ZAP**  
 Wheel centre: plastic,  
 Tread: Polyurethane,  
 with threadguards,  
 precision ball bearing,  
 Flanged wheel: plastic

**Wheel: ZGP electric conductive**  
 Wheel centre: plastic,  
 Tread: thermoplastic rubber,  
 with threadguards, precision ball bearing, Flanged wheel: plastic

**Wheel: ZIP**  
 Wheel centre: plastic,  
 Tread: rubber, with threadguards, precision ball bearing, Flanged wheel: plastic

**Load capacity**  
 100 kg per castor on level and securely attached floors  
 40 kg per castor on walkways

160kg

# Walkway Castors Series 3875

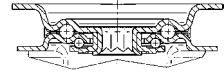

Housing made of pressed steel, bright zinc plated, blue passivated, double ball bearing swivel head, flanged wheel with one ball race, left and right hand design

Load capacity tested according EN 12532

Plate fittings see on page 34-35

"My castor runs to the beat of time."

TENTE is the world market leader for hospital bed castors. Why? Because we put our heart into precise and innovative solutions. The many years of intensive collaboration with prestigious hospital bed manufacturers around the globe has produced an extensive product range of high-quality castors for hospital beds and care beds. No matter how challenging the specific requirements in the medical sector - whether regular cleaning at high temperatures, electrical conductivity or small construction height - the intelligent and top quality solutions of our engineers meet with high levels of appreciation.

<b>5940UAP125R05-32</b>	4031582348330
<b>5940UAP150R05-32</b>	4031582338898

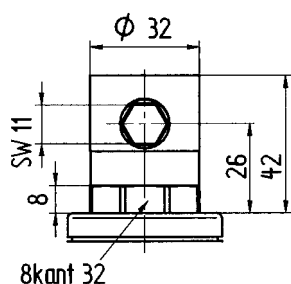

## Swivel Castors with central, total or directional lock

Order number	EAN Code
<b>5944UAP125R36-34XS S30</b>	4031582348334
<b>5944UAP150R36-34XS S30</b>	4031582348361

## Swivel Castors with central-, total lock

Order number	EAN Code
<b>5946UAP125R36-34XS S30</b>	4031582348392
<b>5946UAP150R36-34XS S30</b>	4031582348378

## Advantages of the fitting R36-34XS

- The stem will be vertically fixed by the hexagonal bar
- Torsion will be avoided by the octagonal profile bar
- Adjustment with the frame of the bed
- Fitting screws are not necessary

## Wheel: UAP

Wheel centre:  
Polyamide, Tread:  
Polyurethane, precision  
ball bearing

## Notice

Accessories, dimensions  
and technical  
specification see pages  
210 and 211.

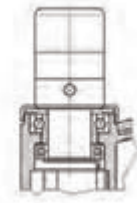

## TÜV Certified

The performance  
standard of these  
castors even surpasses  
the requirements of the  
regulations set out in  
European standard DIN  
EN 12531.

### Advantages of the fitting R36-34XS

- The stem will be vertically fixed by the hexagonal bar
- Torsion will be avoided by the octagonal profile bar
- Adjustment with the frame of the bed
- Fitting screws are not necessary

**Wheel: PJP**  
Wheel centre: Polypropylene, Tread: TENTEprene (thermoplastic rubber), with threadguards, precision ball bearing

**Wheel: PIP**  
Wheel centre: Polypropylene, Tread: solid rubber, grey, non-marking, with threadguards, precision ball bearing

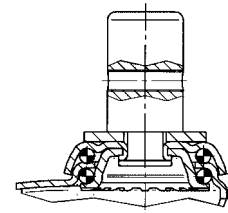

**Wheel: XSP electric conductive, non-marking**  
Wheel centre: Polyamide, Tread: Polyurethane, with threadguards, precision ball bearing, sealed

Additional Snap-on synthetic covers turn the solid metal housing into a nicely designed product.

# Accessories and assembly notice

for castors with central locking system.  
 Change lever 24 mm S45 to transfer the function to the second pair of castors.  
 Adaptor to accept round, customer made lever.  
 bearing bush to support profile steel bars.

Accessory		Order number	EAN Code
		Adaptor	4031582317565

Accessory		Order number	EAN Code
		Change Lever 24	4031582322095
		Change Lever 28	4031582322101
		Change Lever 65	4031582322118

Accessory		Order number	EAN Code
		Bearing Bush	4031582319996

Accessory		Order number	EAN Code
		Profile bar	4031582321166

<p><b>Assembly notice</b>                  All castors are supplied as standard with an easily removable plastic alignment pin in the fitting hole. This pin should not be removed until immediately prior to assembly of the castor. This ensures that the factory adjustments are not inadvertently altered.</p>	<p> <b>Adjustments are possible</b>                  These bed castors are supplied ready-adjusted. Adjustable is possible, but not necessary after normal long term use.</p>	<p> <b>Load capacity</b>                  Load capacities for bed castors are laid down by the European Standard for Castors and Wheels. Series 2940 and 2040/7040: EN 12531                  Series 2470 and 5470: EN 12530</p>

### Automatic reverse

The locking mechanism is activated through the cam via a lever. Model 0: The lever reverses automatically to the base position.

- L0-11 = Cam bore parallel to the long side of plate, SW 11 mm
- Q0-11 = Cam bore perpendicular to the long side of plate, SW 11 mm
- L0-13 = Cam bore parallel to the long side of plate, SW 13 mm
- Q0-13 = Cam bore perpendicular to the long side of plate, SW 13 mm

Hex hole (SW)

### Without automatic reverse

The locking mechanism is activated through the cam via a lever. Model 1: The lever remains in the set position. The lever has to be actuated again to reverse the brake bolt to position 0.

- L1-11 = Cam bore parallel to the long side of plate, SW 11 mm
- Q1-11 = Cam bore perpendicular to the long side of plate, SW 11 mm
- L1-13 = Cam bore parallel to the long side of plate, SW 13 mm
- Q1-13 = Cam bore perpendicular to the long side of plate, SW 13 mm

Hex hole (SW)

### Wheel: PXU

Wheel centre:  
 Polypropylen, Tread:  
 solid rubber, black, with  
 plastic plain bearing

### Order information

A total lock castor system consists of:  
 2 Pcs. 3476 PXU .... P63  
 2 Pcs. 3470 PXU .... P63  
 2 Pcs. Directional lock

### DIN EN 840

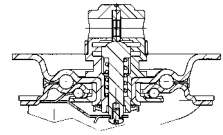

The following versions are specified according EN 840 part 2-5 for mobile waste containers:  
 3476 PXU 200 P69 L0-11  
 3470 PXU 200 P63

205kg

## Castors with central lock Series 3476

Housing made of pressed steel, bright zinc plated, blue passivated, double ball bearing swivel head, dustguard, wheel axle with nut  
Load capacity tested according EN 12532  
Plate fittings see on page 34-35

"Castors play a load-bearing role for me."

TENTE Heavy Duty

If you need to move heavy goods, you must be able to rely on the material one hundred percent. That is why precise construction plays an outstanding role at TENTE Heavy Duty. Sophisticated simulations and unrelenting long-term tests calculate and research how you can move several tonnes of heavy goods more precisely, more simply and, above all, more durably. Make it easy on yourself with TENTE's sound and sustained solutions.

Heavy Duty

Heavy duty castors 294

Wheels 338

# 540 - 600kg

## Heavy Duty Castors Series 3640

Housing made of heavy pressed steel, bright zinc plated, blue passivated, precision ball bearing swivel head, sealed, wheel axle with nut  
 Load capacity tested according EN12532 (4km/h) and EN12533 (6km/h)  
 Plate fittings see on page 34-35

**Wheel: SEP 67 Shore A**  
 Wheel centre: pressed steel, Tread: Elastic-tyre, black, vulcanized, precision ball bearing

**Directional lock**  
 Swivel castors with directional lock are available as 2x180° or 4x90° version. Please order the directional lock separately.

**Double lock**  
 Castors of the 3642 series are also available with an additional 1x360° directional lock.

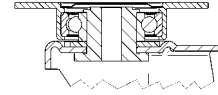

**Foot protection**  
 Different foot protections are available on request.

**Wheel: TOO**  
Wheel made of Polyamide, white, plain bearing, heavy duty

**Foot protection**  
Different foot protections are available on request.

**Directional lock**  
The directional lock is also available as 2x180° und 4x90° version.

# 840 - 1320kg

## Heavy Duty Castors Series 9650

Housing and plate steel-welded, bright zinc plated, blue passivated, sealed swivel bearing with dual purpose bearing and tapered roller bearing, threaded king pin and locking nut secured, grease nipple, wheel axle with nut

Load capacity tested according EN12532 (4km/h) and EN12533 (6km/h)  
Plate fittings see on page 34-35

### Sealing type A

Galvanized steel socket with O-ring and plastic lip sealing. Suitable for pressed mounting installation due to the distance tube between the ball bearing.

### Sealing type B

Labyrinth plastic cover. Only suitable for loose installations.

### Sealing type F

Plastic cover with additional rubber sealing. Only suitable for loose installation.

1000kg

"We get your ideas rolling."

The TENTE range includes more than ten thousand different castors - yet there are always special requirements that make individual customisation necessary. No matter whether this concerns a castor with an individual appearance, small swivel interference or a special suspension: we look forward to finding the perfect solution for your requirements together with you. Please do not hesitate to tell us what you need - we will manufacture the matching castor. Naturally in the proven TENTE quality.

Special solutions

360

## Selected examples for special TENTE solutions

### Spring loaded stem-mountings

For use with institutional castors. The spring suspension can be adjusted to exactly suit your application.

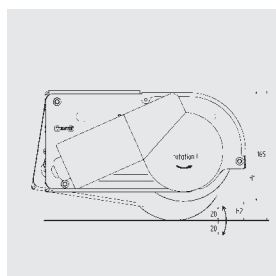

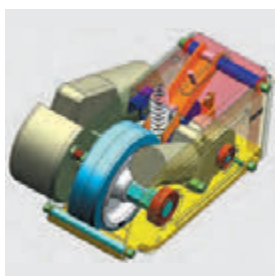

### Quick action fitting for tubes

For much easier castor assembly. No additional tool required for fitting the stem in the rod.

### Complete wheel sets

Upon request we can ship complete wheel sets, consisting of wheels, axle and end caps.

### Powered castors for hospital beds

For use as a fifth castor in the middle of the bed. TENTE has developed a complete system, comprising a powered castor, motors and switch electronics.

### Automatic guided vehicles (AGV's)

Move routine and on-demand deliveries of bulk materials for healthcare, pharmaceutical industry and warehouse distribution centers. Special designed castors offer many benefits for this mobile application, such as:

Suitable to automated washing/cleaning processes (e.g. autoclaves) through solid housings made of stainless steel electric conductive sealed wheels with precision ball bearings.

Besides the serial standard items we offer special locking options, e.g. additional force-loaded directional locks or user-friendly "ball-pen operation".

### Drive wheels

Drive wheels can be supplied in accordance with drawings. You can choose between rubber or polyurethane treads.

### Spring loaded foot protection

The spring loaded foot protection prevents substantially the feet of those who work with transport trolleys of heavy loads from being roll over. These castors meet the exceptionally high safety requirements set up for the aerospace industry.

### Central locking

Save and quick brake function for several castors at a time. The side-mounted actuation lever on the housing guarantees a save and comfortable operation. For hand or foot operation.

### Castors for heavy load

Our industrial castors offer a load capacity of up to 11 tons. Directional lock option is available.

### Castors with integrated spring

We offer spring loaded swivel and fixed castors for the safe transport of fragile merchandise. Spring will be adjusted according to your specification.

# Product user information

According to the definition of the liability of manufacturer for their products, the apparatus and product safety law (GPSG; EU-guidelines 2001/95/EG) the following information has to be followed. Deviation from this information will release the manufacturer from his liability. We are required to give our customers detailed information about the use of our products. Disregarding this fact will release the manufacturer from his liability.

Please note that the technical details in this catalogue could be subject to change.

## 1.0 Product Information and Determined Use

Wheels and castors, according to this definition are constructional parts that are generally interchangeable.

They are fitted to apparatus, furniture, transport systems or similar products to make them mobile.

This product information refers to castors and wheels, particularly to swivel castors (not steer castors) which are used on non-powered equipment at a speed not exceeding walking pace and not being under continuous motion.

castors and wheels according to this product information, can be divided into the following categories of application:

- Domestic Use: e. g. seating, furniture
- General Services: e. g. shopping trolleys, office equipment
- Health Care Services e. g. hospital beds, patient trolleys

- Industrial Purposes: e. g. transport equipment with medium and heavy duty load bearing capacities.

The wheels will give a long and troublefree life if the following points are adhered to:

- Correct and secure fitting at the designed position.
- The fitting must have adequate strength and material for a secure fitting.
- The function of the castor must not be changed nor affected by the fitting.
- The swivel action axle must be vertical at all times.
- Fixed castors must have their wheel axles in alignment.
- If only swivel castors are used, they must be common to each other.
- If fixed castors are used in conjunction with swivel castors then all castors must be compatible and recommended by the manufacturer.

If castors are used in areas such as: outdoors, coastal areas, corrosive and/or aggressive areas, special products have to be specified.

For use in temperatures below 5 °C and above 30 °C the efficiency of the castor can be impaired, particularly the normal load capacity as published can be affected when

## European guidelines 2002/95/EG (RoHS)

Most of our products are RoHS compliant, according to the guidelines of the electro- and electronic industry.

used in temperatures below/above those stated herein. Special products can be specified. Component parts are assembled into a complete castor. The manufacturer is only liable for the original component parts making the complete castor.

When selecting a castor it is necessary to consider all aspects of the symbol chart as published.

### 2.0 Misuse

The word 'misuse' can be defined as:

#### 2.1 Overloading

#### 2.2 Unsuitable flooring

#### 2.3 Excessive temperatures

#### 2.4 Failure to release brakes

#### 2.5 Exposure to caustic substances

#### 2.6 Excessive shock load

#### 2.7 Ingression of foreign objects into the wheel tread

#### 2.8 Excessive speed

#### 2.9 Changes made to the component parts and assembled castors not previously agreed with the original manufacturer.

### 3.0 Product Capability

Should the user not find a product clearly described in the manufacturers catalog,

leaflets, descriptive literature etc. then any new castor designed for the particular application has to be fully agreed with the manufacturer. Any new designs effected will be subject to the relevant DIN, ISO, EN- STANDARDS as well as the Quality Standard RAL-RG 607/10.

### 4.0 Maintenance

Regular maintenance of castors:

Regreasing of axle and swivel bearings; retightening of axles and/or adjustable king pin, when fitted.

Should any cleaning agents be used, then these same agents should not contain corrosive, nor grinding elements.

### 5.0 Product Information and User Guide

It is necessary to ensure that the Product Information and User Guide is made available when required and that the reseller ensures that the customer is supplied with the necessary catalog: that the Original Equipment Manufacturer, on whose equipment the product is fitted, ensures the end user has the Product Information and User Guide.

To ensure proper function of the castors and wheels the reseller must consider the Product Information (1.0 to 6.0). This product information can be supplied for issue to the manufacturer of the equipment. The manufacturer of the equipment has to refer to the Product Information (1.0 to 6.0), copies of this Product Information can be ordered from the castor manufacturer for the distribution to the end user.

## 6.0 Key to pictograms

### Omission:

load capacity

shock or fall

uneven floors

brake applied

chemical substances

thermic influences

excessiv speed

lateral forces
